Eric,

Attached is Guardian Environmental Services' response to the information request regarding the Holy Trinity Cemetery Site. Environmental Restoration has declined to provide any additional information for consideration in the task order selection process. Please review GES' response and the information you have on hand for both contractor's in your contractor selection process.

Ratings must be noted in the appropriate criteria on the Contractor Selection form. For example, Item 1 should be considered under "Equipment and Labor Rates", Item 2 should be considered under "Location", Items 3 & 4 should be considered under Company Expertise" and Item 5 should be documented under "Past Performance". Good or bad assumptions made by the contractor, based on the information we provided, can also be mentioned under the appropriate criteria. Please make sure you address each criteria Item for both contractors as part of your evaluation. Mark Pane can assist you, if needed.

As a reminder, for this task order we indicated that technical factors are equal to cost factors. **In addition, please remember that responses (or lack thereof) constitute source selection materials and cannot be shared with any party outside of the EPA.**

Kudos again for your Fair Opportunity Notice.

Please give me a call if you have any questions.

Karen
